

**Printing instructions:** Print on both sides of a sheet of cardstock. Cut along crop lines. Four cards will be created with each page. Fold so that **WWW.GEOCACHING.COM** is plainly seen.

**Geocaching** is a worldwide recreational activity enjoyed by GPS (Global Positioning System) users. It involves a GPS user hiding a "cache" (usually a waterproof container of trinkets) and posting the exact coordinates so other GPS users can come on a "scavenger hunt" to find it. There are caches of all kinds for all ages and are usually placed in interesting locations in your area that you may not know about. That makes it all the more interesting to find! When you find one, take any trinket you like and leave one of your own to keep the cache full.

If you'd like to play, it's easy (and free). If you already own a GPS and have access to the World Wide Web, then you have everything you need. Just log on to **www.geocaching.com** and check for caches in your area. So, go to the website, plug the coordinates of a cache near you into your GPS, and go find it!

## WWW.GEOCACHING.COM

**Geocaching.com** encourages a friendly attitude towards natural resources with its "Cache-In, Trash-Out" philosophy. Geocachers are encouraged to tread lightly in the wilderness, respect private property and remove litter from public places whenever possible. Geocachers understand that the future of this activity depends on maintaining respectful, open communication with local, state, and federal officials.
